THE GREAT BRAND FOR PROGRESS

UNILUX Safety Packages

UNILUX SAFE II:

4-corner locking mechanism against break-ins.

Burglars often fear the noise of breaking glass, they would rather try to unhinge the window from its frame. This is why UNILUX offers you the 4 corner locking mechanism for each sash. All 4 corners of the sash are secured tightly by sturdy mushroom head bolts (medium tensile force 20000lb per mushroom head bolt) in steel locking components offering protection against break-ins. The threaded connection of fittings in steel reinforcements in vinyl windows and/or the extremely sturdy threaded connection of wood and aluminum clad wood windows, even with fittings hidden in wood, complete this safety equipment. Of course multi-sash windows can also be equipped with the UNILUX Safety Packages.

Handle with lock button.

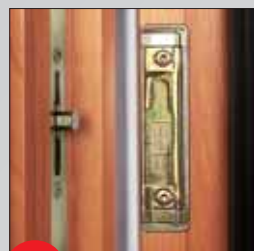

Another break-in method is to open the window by pushing the lock aside with a tool set between window and frame. A handle with locking button protects against this by locking the closing device which can then only be moved when the lock button is simultaneously pressed. This makes it impossible to move the opening mechanism from the outside.

UNILUX SAFE III:

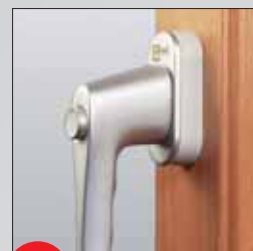

UNILUX SAFE II with safety glass A1.

Almost impossible to break:

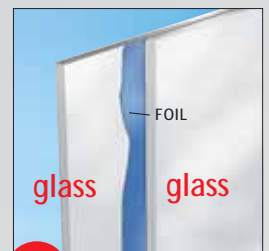

If a burglar feels relatively safe he will risk breaking a window pane in order to enter a building. UNILUX offers toughened A1- safety glass in combination with SAFE. DIN- tested by the State Proof House, Mellrichstadt, Germany. Due to a special, highly tear proof polycarbonate film between the two panes of glass this remains sealed even when the glass shatters thereby preventing entrance. Of course this safety glass has an excellent thermal insulation value of U_g 0,19 BTU (hr-ft²-F (US)) as well as sound insulation classification 3. A1-Safety glass even withstands the third impact of a ball weighing 10lbs (dropped from a height of 8 feet).

1 4-CORNER MUSHROOM HEAD BOLT

2 HANDLE WITH LOCKING BUTTON

3 TESTED TEMPERED SAFETY GLASS A1

UNILUX SAFE II

Extra charge per sash
only **16,90 €**
